UNRESTRICTED EXPLOSIVES.

Rule (h).—Explosives comprising the first two items of Division 1 of class 6, namely, safety cartridges and safety fuses for blasting, may be treated in all respects like ordinary combustible cargo. They need not be kept in a magazine while on board ship within the harbour, and may be landed or shipped at any place indicated by the Port Trust Board for the handling of combustibles.

DISCHARGING THE EXPLOSIVES DEALT WITH IN RULE (f).

Rule (i).—Vessels referred to in rule (f), when discharging their explosives, must be moored outside the harbour entrance, at one of the outside berths, at anchor or otherwise as the Port Trust Board may direct. Lighters carrying the explosives of vessels so moored may discharge only at such point or points as the Board may direct—ordinarily at a place outside the enclosed harbour. But in the event of a vessel arriving in rough weather, when in the opinion of the Chairman of the Board discharge at an outside berth would be attended by danger, he may, at his discretion, give special permission for such vessel to open her magazine and to discharge the explosives into lighters at a berth inside the harbour under such restrictions as he may see fit to impose and to land them at such places and under such conditions as he may direct.

SHIPPING THE EXPLOSIVES DEALT WITH IN RULE (*f*).

Rule (*f*).—The explosives referred to in rule (*f*) must be shipped or transhipped at one of the outside berths, but may only be landed into boats at places indicated by the Port Trust Board and under such conditions as the Chairman of the Board may see fit to impose.

EXPLOSIVES INTENDED FOR OTHER PORTS THAN MADRAS.

Rule (*k*).—Vessels carrying explosives of the following classes, intended for discharge elsewhere than at Madras, may enter the harbour, provided that such explosives are contained in a properly-constructed magazine as defined in rule (*f*) and provided that such magazine is kept closed while the vessel is inside the harbour:—

Class 1, Gunpowder class.
" 3, Nitro-compound class.
" 6, Ammunition class.

SMALL QUANTITIES OF EXPLOSIVES.

Rule (*l*).—Nothing in rules (*f*) to (*k*) shall apply to a vessel carrying explosives of a less weight than 25 lb. in all.

SEPARATION OF CERTAIN CLASSES OF EXPLOSIVES.

Rule (*m*).—Any explosive of the 5th (Fulminate) class, or any explosive of the 6th (Ammunition) class which contains its own means of ignition, or any explosive of the 7th (Fireworks) class, shall not be conveyed in any ship or boat with any explosive not of the class and division to which it belongs, unless it be separated therefrom to prevent any fire or explosion which may take place on any such explosive being communicated to the other explosives.

EXPLOSIVES EXCLUDED FROM THE HARBOUR ABSOLUTELY.

Rule (*n*).—The following explosives are absolutely excluded from the harbour:—

Class 4, Chlorate mixture.
" 5, Fulminate.
" 7, Fireworks, Division 1.

SIGNALS AND PRECAUTIONS WHILE AT THE PORT.

Rule (*o*).—Whilst any explosives remain on board any vessel at the port of Madras, whether outside or inside the harbour, the signal flag 'B' Commercial Code shall be kept flying at the foremast head between sunrise and sunset and the port signal provided for the purpose, viz., a white light over three red lights hoisted in a vertical line one over the other not less than three feet apart, between sunset and sunrise. The master or chief officer shall remain on board until the explosives intended for Madras shall have been discharged. Every ship or steamer in the harbour carrying explosives shall be moored at a distance of not less than fifty yards from every other ship or steamer in the harbour.

PRECAUTION AGAINST SPARKING.

Rule (*p*).—The master of every vessel receiving or discharging explosives shall see that the platform in the vessel's hold to be used in receiving or delivering such explosives, and the gangways and coamings of the hatchways of such vessels, are covered with tanned hides or other suitable paddings, that the barrels or boxes containing any such explosives and received on board any such vessel are carefully stowed therein, that the hatches of such vessels are properly secured and locked, and that the key of the magazine in which any such explosives may be stowed remains in his own possession. All persons concerned in the handling, or in supervising the handling, of any such barrels or boxes of explosives shall wear suitable shoes without any metal nails or other metal in or upon them, or shall wear no shoes.

PRECAUTIONS ON LIGHTERS, BARGES AND BOATS.

Rule (*q*).—Barges, lighters and boats about to be used for the transport of any explosives shall be kept scrupulously clean and free from loose explosives, and shall not, when at anchor with explosives on board, lie closer than one cable's length or 200 yards from any of the ship-ping in the port or from any public landing place, and all explosives in any such barges, lighters or boats shall be securely covered with tarpaulins. Whilst any such explosives shall remain on board, a red flag shall be kept flying on every such barge, lighter or boat between sunrise and sunset and, in addition to the regulation anchor-light, a red light in an elevated position shall be shown from any such barge, lighter or boat between sunset and sunrise. No fire, smoking or matches shall be allowed on board any such barge, lighter or boat, nor any light of any kind except the red light mentioned above—except in the case of properly-decked barges on the deck of which may be allowed one lantern of good pattern. Kerosine or other easily ignited oil is not to be used for the above-mentioned lights. The tindal and at least half of the crew of every such barge, lighter or boat shall remain on board until all its explosives shall have been discharged.

CONDITIONS FOR LANDING FROM BOATS AT THE APPOINTED PLACES

Rule (r).—All barges, lighters and boats, having explosives on board to be landed at any of the landing places appointed by the Port Trust Board, shall remain off those places until orders to approach shall be received from the officer directing the landing. Not more than two boats, or at the discretion of the officer directing the discharge four boats, shall unload simultaneously.

PRECAUTIONS ON THE VESSEL WHILST EXPLOSIVES ARE BEING LANDED OR SHIPPED.

Rule (s).—Explosives which may be landed or shipped inside the harbour under rule (q), if properly packed as required by schedule IV, and rules 73 to 76 of the rules issued by the Governor-General in Council under section 5 of the Indian Explosives Act of 1884, may be shipped on board, or discharged from, a vessel lying at the ordinary moorings within the harbour. Such shipment or discharge shall be effected under the precautions and conditions mentioned and contained in these rules, and such explosives must be taken on board the vessel for which they are intended immediately after the boat carrying such explosives has come alongside. No cargo boat or other vessel having fire on board shall be allowed to lie nearer than one cable's length or 200 yards from such vessel during the time that any explosives are being shipped. All other cargo work on board such vessel shall be stopped while such shipment or discharge is taking place.

PRECAUTIONS IN THE MATTER OF FIRES.

Rule (t).—When explosives—other than those mentioned in class 6, division 1, of the rules made by the Governor-General in Council under section 5 of the Indian Explosives Act, 1884—are shipped or discharged within the Madras port limits, no smoking of tobacco will be permitted on board the vessel on which they are being shipped or from which they are being discharged, and all fires and lights on board shall be extinguished before the barge, lighter or boat bringing such explosives for shipment, or receiving such explosives to be landed, shall come alongside of such vessel. Should it be necessary, in the case of a steamer, that the fires in her engine room should remain lighted, the barge, lighter or boat so bringing or receiving such explosives shall be placed to the windward of the steamer's funnel, and in the event of the steamer swinging, such explosives must be covered with tarpaulins until such barge, lighter or boat is removed to a safe and proper position.

HOURS OF WORKING.

Rule (u).—No explosives other than those mentioned in class 6, division 1, of the rules made by the Governor-General in Council under section 5 of the Indian Explosives Act, 1884, shall be discharged from a ship or may be shipped from the shore before 6-30 a.m. or after 4 p.m.

RESTRICTIONS ON THE OPENING OF MAGAZINES.

Rule (v).—Except in cases of emergency no magazine on board of any vessel containing explosives, other than safety fuzes, safety cartridges and caps, shall be opened while the ship is inside the harbour, without the permission of the Chairman of the Port Trust Board. But if such magazine should be opened and, in the opinion of the Board, the emergency was not such as to justify the master of the vessel in opening it or allowing it to be opened, he shall be deemed to have contravened this rule. Such magazine shall remain opened only for the time required to remove or stow explosives, and that operation shall always be performed in the presence of an officer of the ship.

PASSAGE OF EXPLOSIVES THROUGH HARBOUR PREMISES.

Rule (w).—So far as they are applicable, the Government of India rules 72 to 138, as laid down in Department of Commerce and Industry notification No. 1013-53, dated the 9th June 1914 (or as modified by subsequent notifications), shall apply to the conveyance of explosives through Madras harbour premises, whether by boat, cart or rail.

1916-17 ലെ ഇന്ത്യാ ഗവർമ്മെണ്ടുവക മാനാവുന്ന കടം.

തപ്പാലാപ്പീസ് വകപ്പു.

1931 നു മുമ്പുള്ളതെയും 1936 ൽ കവിയാതെയുമുള്ള ഒരു കാലത്തിനുള്ളിൽ ഉല്യുവിലക്ക് തടക്കിക്കൊടുക്കുന്ന കടം.

കൊല്ലത്തിൽ നൂറിനു നാലുവീതമുള്ള പലിശ ഇതിലേക്കുള്ളതിനു ഏപ്രിൽ 1-ം തീയതിയും ഒക്ടോബർ 1-ം തീയതിയും കൊടുക്കുന്നതാകുന്നു.

N.B.—Figures for the year 1915–16 are subject to alteration as the accounts have not yet been finally closed.

No. 760.—Under sub-section (1) of section 256 of the Madras District Municipalities Act, 1884, the Governor in Council proposes to issue the following rules for regulating schemes for the extension of towns undertaken by municipal councils and building operations within the same, in lieu of those published on pages 505 and 506 of Part I-A of the *Fort St. George Gazette*, dated 20th August 1913, and page 253 of Part I-A of the *Fort St. George Gazette*, dated 7th April 1914.

Any objections or suggestions which it may be desired to make in respect of these revised rules which are received before 1st October 1916 will be taken into consideration. None received after that date can be considered.

Draft rules.

(1) *Provision of accommodation to precede eviction.*—When the opening up of a congested area in any municipality involves the eviction of any of the inhabitants, due provision should be made for their proper housing elsewhere, before their houses are acquired. Where possible, they should be induced to accept sites or houses elsewhere in part or whole compensation for the property acquired.

(2) *Selection of site.*—In selecting a site for an extension, the following considerations should be kept in view:—

(*a*) It should be accessible and convenient to the people concerned;

(*b*) it should be adequate in extent, allowing space for all the requirements of a suitable lay-out as defined in rule (3), and where possible for future expansion;

(c) where possible, it should be elevated and open and should have a sufficient slope for proper drainage;

(d) the sub-soil should be as pervious as possible, gravel, sand or light loam being preferred to clayey soils, and the sub-soil water should not rise too close to the surface.

(2) *Laying out the site.*—In laying out the site, the following matters should be provided for:—

(a) Main and secondary streets and their connection with those of the parent town;

(b) the reservation of suitable open spaces and of sites for any buildings that are likely to be required for the convenience of the public or any section thereof;

(c) public latrines; these should be as unobtrusive as possible, consistently with convenience;

(d) public wells, where no piped water-supply is available; these should be remote from cesspits or other sources of contamination; and

(e) sub-division, when necessary, into separate blocks suitable for people of different occupations or classes.

The provision of streets, drains, wells and latrines should ordinarily be put in hand concurrently with the development of the site.

(3) *Streets.*—The minimum width for main streets should be 40 feet exclusive of lateral drains. A suitable width for secondary streets is 30 feet. The roadway should be metalled at least to the extent of half its width. Provision should be made for avenue trees at the sides. Stormwater drains of oval section should ordinarily be provided at the sides. Cross streets should be provided at intervals of not more than 660 feet.

(5) *Conservancy lanes.*—Ordinarily conservancy lanes 10 feet in width exclusive of lateral drains should be formed along the backs of houses to enable the conservancy carts and scavengers to enter for the purpose of cleaning backyards and for the laying of drainage pipes in the event of the town being provided with underground drainage. In the case of houses with gardens, however, provision may be made for giving the sweeper access from the main street along the side of the compound. Conservancy lanes also must be provided with side drains of oval section.

(6) *Plotting of sites.*—After making provision as above the remainder of the land available should be plotted into house-sites. In plotting house-sites, the means and occupations of the people to be provided for, must be considered; a site of 2,400 square feet should ordinarily be the minimum. It is unnecessary to aim at rigid uniformity of size or shape if more convenient plots can be secured otherwise. The average size may also reasonably be different for main and minor streets.

(7) *Disposal of house-sites.*—House-sites disposed of by municipal councils should ordinarily be sold by auction which may be open to the public generally or confined to the members of the caste or castes for which the particular extension is intended.

(8) *Application to build.*—Within six months of the completion of the sale, the application for construction must be made.

Every application to construct, reconstruct, or extend a building shall, in addition to the particulars required by section 180 of the District Municipalities Act, be accompanied by—

(a) *Site plan*—a site-plan in duplicate drawn to a scale of not less than one inch to thirty-three feet showing—

(i) the boundaries of the site and, if the locality has been surveyed, the number of the survey field or sub-division in which it stands;

(ii) the name or description and the width of every street adjoining the site, and the position and use of adjacent buildings;

(iii) the area to be occupied by the proposed building;

(iv) in the case of an extension, the nature and use of all existing buildings on the site and the relative position of the existing and proposed building;

(v) the nature of the ground on which the proposed building is to be erected, whether made or natural, whether rocky, clayey, gravelly, sandy or mixed as the case may be; and in the case of made ground, the time when it was so made and the materials used in making it; and

(vi) the position and dimensions of proposed latrines, urinals, drains, cess-pools, stables, cattle-sheds, cow-houses, wells and other appurtenances of the building;

Provided that if the estimated cost of the construction, reconstruction or extension is Rs. 100 or less, it shall be sufficient for the site plan to show, without scale, the size of the proposed building and its position on the land, and the position of the land with reference to adjacent buildings or lands.

(b) *Plan of proposed building*—a plan of the proposed building in duplicate, drawn to a scale of not less than one-eighth of an inch to a foot showing—

(i) the plan of each floor with sections and elevations in the same scale;

(ii) the levels of the foundation and lowest floor or plinth, with reference to the level of the centre of the principal adjacent street and the level of the site;

(iii) the depth and thickness of foundations;

(iv) the height and thickness of the plinth or basement walls, and of the walls above;

(v) the thickness of the floor or floors and the dimensions and structure of the roof;

(vi) the number of doors, gates, or windows to be constructed, with an indication as to which of them open outwards in any street.

(c) *Specification*—a specification showing—

(i) the method of construction and the nature and description of the materials to be used including the dimensions of all beams, posts, pillars and columns;

(ii) the manner in which the surface drainage of the land will be disposed of;

(iii) the means of access to latrines for scavengers;

(iv) if the building is intended to be used as a dwelling house for two or more families, or as a place for carrying on any trade or business in which more than twenty persons may be employed, or as a place of public resort, the means of ingress and egress.

Provided that clauses (b) and (c) above shall not apply to buildings of an estimated cost of Rs. 500 or less.

(d) *Application for permission to cover any drain*—if it is proposed to place a covering over the side drain to give access to the house a separate application to the Municipal Council to erect such covering

N.B.—If it is proposed to use the building or part thereof for any of the offensive or dangerous trades specified in section 168 of the District Municipalities Act or as a factory, stable, cattle-shed or cow-house or as a place for the keeping of goats, pigs, sheep or poultry, the fact must be expressly stated.

(9) *Plan to be approved.*—Construction shall not be commenced until the plan of the building has been approved or unless the time limit fixed by section 180 of the District Municipalities Act has expired and the Municipal Council has passed no orders granting or refusing a license.

(10) *Time limit for building.*—In the absence of orders of the Municipal Council to the contrary construction must be completed within 18 months of the date from which commencement is permissible under the preceding rule.

(11) *Only one house may be built on each site.*—No more than one dwelling house shall be built on any one site nor shall any site be sub-divided.

(12) *If open to face the street.*—When the houses are continuous, each house should directly face the street. It shall not be permissible to construct a building for separate occupation without exclusive access to the same from a public street.

If it is desired to erect such a building on an area not contiguous to an existing public street, a road shall be laid out to give access to it of such a width and construction as the Municipal Council shall approve.

(13) *Area to be covered by buildings.*—There shall be in the rear of every domestic building an open space of at least 10 feet extending along the entire width of the building and belonging exclusively to the building unless the back of the building abuts on an open square or the like of not less than 20 feet in width which is dedicated to public use and is consequently not likely to be built upon. Where, however, the site is of such a nature that it is impracticable to provide an open space as prescribed above, the Municipal Council may relax the rule to such extent as may be necessary, but in no case shall the area occupied by masonry buildings or verandahs exceed two-thirds of, and in the case of buildings of two or more floors, one-half of, the total area of the site.

In the case of existing premises which it is proposed to rebuild and which do not at present comply with this rule, it shall be permissible to vary the proportion and position of open space—but unless this rule is complied with, no increase in the total cubic contents of the building will be permitted.

(14) *Back to back houses prohibited.*—The construction of houses back to back with no intervening space is prohibited.

(15) *Circumstances in which thatch is allowed.*—No house or out-house shall be constructed with thatch except in special localities selected by the Municipal Council with the approval of the Collector.

(16) *Ventilation.*—The Municipal Council shall require such provision for ventilation as it may consider proper with reference to the circumstances of each case. Ordinarily the doors and windows opening into the external air of every room in a domestic building which is intended for habitation should cover a space equivalent to not less than one-fifth of the floor space of the room they serve to ventilate.

(17) *Precautions against damp.*—Provision must be made in all buildings for keeping out damp. Ordinarily a masonry plinth of 18" above the street level is the best means of doing this. A damp proof course is also desirable.

(18) *Height of walls.*—The main walls of the house shall not be less than 10 feet high. The eaves must not be less than 8 feet above the ground.

(19) *Access to backyards.*—All backyards of houses must be provided with gateways or doorways so as to give access to the scavenger and to the municipal inspecting officers.

(20) *Drains and privies.*—Every building shall be provided with such drains and privies as the Municipal Council may consider necessary. The privies must be situated at such a distance from any dwelling house or from any well, spring, tank or stream of water used or likely to be used by men for drinking or domestic purposes or for manufacturing drinks for the use of men as may be approved by the Municipal Council. Where a bath room or bathing plat form is provided the floor should be impervious and provision should be made for carrying off the water to the nearest drain.

(21) *House drainage.*—Where a conservancy lane is provided, all sullage water from the house and its backyard shall be led into the drain in the conservancy lane and not into the drain in front of the house which is provided to carry off storm-water.

(22) *Cattle-sheds.*—All cattle-sheds should have impervious floors and be properly drained.

(23) *Walls or fences.*—All sites shall be enclosed by compound walls or fences of such description as the Municipal Council may prescribe.

(24) *Excavations prohibited.*—Except in so far as may be necessary for the excavation of foundation or wells or the levelling or sloping of the ground no purchaser of a house-site shall remove earth from the site for building or any other purpose so as to leave hollows in it.

(25) *Conditions of sale-deed.*—Every notice of sale of a building-site by the Municipal Council and every sale-deed in respect thereof shall embody rules (8) to (24) supra as conditions of sale and shall also contain a condition that if the purchaser fails to complete the construction of the house as required by rule (10), his title to the site shall cease and determine and the site shall revest in the Municipal Council and the purchaser shall be entitled only to a refund of 90 per cent of the price originally paid by him to the Municipal Council. In case of a breach of any of the rules (11) to (24) the Council shall call upon the owner of the plot to make the necessary alterations or provision within a period of three months, in default of which the Municipal Council shall be authorized to make them itself and recover the cost from the owner.
